

**Offers for Immediate Sale on behalf of
Bluestone Mines Tasmania Pty Ltd**

**8,000 kg per hour colloidal mixer grout slurry batching plant for
CRF mine back fill - new & unused.**

Details

This modular semi portable skid-mounted slurry mixing system is designed for the production of grout slurry in a confined space. This new and unused package has been full tested and delivered to site ready for installation.

Set up as a fully automated plant the capacity exceeds 8000kg of high quality grout per hour designed on a 1,350 litre batch size with self cleaning pressure wash system for end of shift clean up.

The modular design uses 3 skids allowing for easy transportation through a 4m wide drift, incorporates roll cage protection and quick connects on the electrical and pneumatic systems for easy disassembly and re assembly.

The plant allows for maximum flexibility of batch recipes, accepts bulk cement delivery into 1 x 12 tonne and 1 x 10 tonne cement hoppers and delivery of the slurry by local or remote control via the spray delivery bar.
