

2013 Qingdao ZY3215 Tunnel Type Roller Conveyor Shot Blasting Machine

Make	Qingdao Zhuye Foundry Machinery		Model	ZY3215 Tunnel Type Shot Blasting Machine	
Year	2013	Hours		As at	
Mileage			km	As at	
Serial/VIN			Engine Serial		
Details	<p>2013 Qingdao ZY3215 Tunnel Type Roller Conveyor Shot Blasting Machine. This fully automatic airless tunnel type shot blasting machine is set up with roller conveyor feed and has 3200 mm wide x 1500 mm high clear feed opening and can accept material up to 12 mtrs long.</p> <p>On pass-through the shot blast machine, items are treated by 10 x 11 KW blast wheels with the abrasive material is collected via a 120 tonne/hour bucket wheel excavator system back to storage in the 6 tonne Abrasive storage bin.</p> <p>After blasting is completed, the materials pass through an 18.5 kw blow off system and dust is collected by a 37 kw and 54 filter cartridge dust collector with a capacity of 33,000 m3/hour.</p>				

The three conveyors for feed, processing and recovery sections are adjustable from 0.5 - 5 mtrs per minute via PLC control.

This system is designed for removal of mill and forge scale, rust, pre-treatment for painting of structural steel, removal of burrs and flashes, increasing surface roughness for painting, removal of moulding sand and residues and provides a highly efficient system improving work floor productivity and dramatically reduces project delivery times and costs.
